Gentlemen,

I spoke with Demita on FT1004 and it appears the sample Lonestar received may not be the same waste as what was sent to the laboratory for analysis and let me explain why. The BTU value on the lab report for FT1004 is 14,000 however the BTU value on the sample that Lonestar received is only 300 and 90% water. Did we sample this tank differently for waste analysis versus QS/QC sample for Lonestar?

Thanks,

Beth Crawford
